The 15th Asia-Pacific Network Operations and Management Symposium
APNOMS 2013

www.apnoms.org/2013

Sponsored by IEICE ICM, KICS KNOM
Technically co-sponsored by IEEE Communications Society

September 25-27, 2013 in Hiroshima, Japan
- Integrated Management of Network Virtualization -

APNOMS (Asia-Pacific Network Operations and Management Symposium) has been a premier conference on network operations and management in the Asia Pacific region. APNOMS 2013 is sponsored by the KICS Committee on Korean Network Operations and Management (KNOM) and IEICE Technical Committee on Information Communication Management (ICM). APNOMS meets every year, typically during September and boasts a rich history of successes. The 15th Asia-Pacific Network Operations and Management Symposium (APNOMS 2013) will be held in Hiroshima, Japan from September 25 to 27, 2013. The theme of APNOMS 2013 is "Integrated Management of Network Virtualization". APNOMS 2013 includes a full three-day program of keynotes, tutorials, technical sessions, innovation sessions, panel discussions, poster sessions, and exhibits that focus on managing networks that span the computing and telecommunications areas. It will encourage open discussions on technology alternatives that focus on the management and operation of current and future networks and services. Please refer to the APNOMS 2013 homepage (http://www.apnoms.org/2013/) for detailed technical programs and events.

Exhibitions Invitation:

APNOMS 2013 OC cordially invites your organization to provide an excellent exhibition in APNOMS 2013. The exhibitions will provide another very good place to demonstrate the high technology level of your solutions & products for efficient network analysis, operations and management of current and future networks and services.
